Upcycled NBF® Bilberry Bi-Phase Lotion

Description:

This Bi-Phase Lotion is an ideal lotion to use at night, to perfect makeup removal, or in the morning for a gentle refreshing effect. Nordic Beauty Bilberry Extract, combined with Nordic Beauty Brassica Finlandia, hydrates, protects and rejuvenates the skin, while increasing its elasticity.

Key ingredients:

- Nordic Beauty Bilberry Extract is an up cycled cosmetic ingredient that concentrates all the benefits of bilberry (*Vaccinium myrtillus*). It is a rich source of phenolic components, organic acids and vitamins. Thanks to its high percentage of antioxidants, it protects the skin from premature aging and increases its elasticity.
- Nordic Beauty Brassica Finlandia is a natural cold processed oil that concentrates all the benefits of boreal type rapeseed. Rich in essential fatty acids, vitamins, lecithin and phytosterols, Brassica Finlandia deeply moisturises, repairs and softens the skin.
- Vegejel® Brassica is a viscosity modifier and film former based on Brassica Rapa Seed Oil. It forms a moisture barrier on the skin that retains hydration while providing a soft and silky skin feel. It is energizing as it increases the microcirculation.

Ingredient	Phase	INCI Name	Qty%	Function
Nordic Beauty Bilberry Extract	A	Betula Alba Juice (and) Vaccinium Myrtillus Fruit Extract (and) Preservative system according to customer's choice	46,50%	Moisturizer, Increases microcirculation

Vegejel® Brassica		Brassica Rapa Seed Oil (and) Dextrin Palmitate	20,00%	Viscosity modifier, Film former

Procedure

Weigh raw materials of phase A and put under stirring.
Keep under stirring until homogenization.
Adjust the pH around 5.5 if necessary.
In parallel, weigh phase B and put under stirring until homogenization.
When two phases are homogeneous, package phase A then phase B in packaging.

Efficacy testing

2 subjects - on the hand:
- Microcirculation increase of 7% at 5 minutes after application
- Skin Hydration has been increased by 242% 5 minutes after application
- Skin Hydration has been increased by 138% 5 minutes after lotion removal
