

Dynoadd® - uniform PMMA particles

PRODUCTNAME	DESCRIPTION	PAINT SYSTEMS	SPECIAL FEATURES
DYNOADD P-506	structural additiv - improves scratch resistance - adjustment of gloss or matting - smooth and uniform touch - particle size: 6 µm		- PMMA particles - very narrow particlesize distribution - matting effect
DYNOADD P-510	structural additiv - improves scratch resistance - adjustment of gloss or matting - smooth and uniform touch - particle size: 10 µm		
DYNOADD P-515	structural additiv - improves scratch resistance - adjustment of gloss or matting - smooth and uniform touch - particle size: 15 µm	- solvent borne - waterborne - UV curing	- PMMA particles - very narrow particle size distribution - matting or structuring effect (depending on film thickness)
DYNOADD P-520	structural additiv - improves scratch resistance - adjustment of gloss or matting - smooth and uniform touch - particle size: 20 µm		
DYNOADD P-530	structural additiv - improves scratch resistance - adjustment of gloss or matting - smooth and uniform touch - particle size: 30 µm		- PMMA particles - very narrow particle size distribution - structuring effect

Dynoadd® - uniform PMMA particles

PRODUCTNAME	DESCRIPTION	PAINT SYSTEMS	SPECIAL FEATURES
DYNOADD P-540	structural additiv - improves scratch resistance - adjustment of gloss or matting - smooth and uniform touch - particle size: 40 µm	- solvent borne - waterborne - UV curing	- PMMA particles - very narrow particle size distribution - structuring effect
DYNOADD P-560	structural additiv - improves scratch resistance - adjustment of gloss or matting - smooth and uniform touch - particle size: 60 µm
